

# ATGF AGENT UPDATE

April 29, 2014

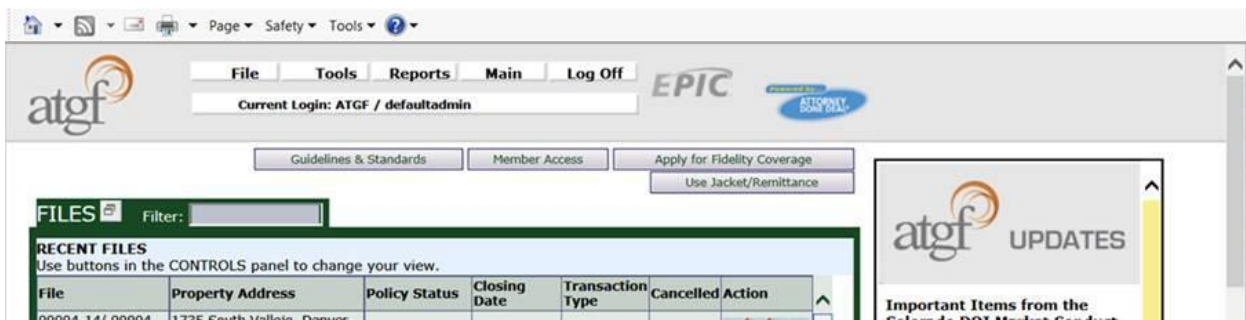

Do you know what the Zeus Bot, Zero Access Rootkit Malware, and Gozi Virus are? You should. They could destroy your business and ruin your life. We've talked with a lot of agents over the last year that are very confident with their local banks and tellers, unfortunately, these types of virus's can be at work on your computer and you don't know it until it's too late!

According to the FBI, once the Zeus Bot is engaged, the hackers secretly monitor the victim's computer activity, enabling them to obtain bank account numbers, passwords and authentication information as the victim types them into the infected computer. The hackers can then execute an array of financially-oriented attacks such as wiring hundreds of thousands of dollars out of your escrow account!

To follow best practices security policies, you should have coverage in place to protect you and your business. ATGF has partnered with The Wright Group to offer agents an exclusive fidelity insurance program at highly competitive prices. The Wright Group Services (TWG) combines 30+ years of experience with leading-edge products to provide exceptional service and value to our customers.

It's easy to apply and very affordable.

While logged into EPIC click on the **"Apply for Fidelity Coverage"** button.

Once inside, click on the application link (See example below) complete the application and click submit.

If you are an ATGF agent interested in the program or have any questions, please contact TWG Services, at 303.863.7788.

For information about becoming an ATGF agent, please contact ATGF at 1.800.525.6558.
